EXPERIENCE

Full-stack developer trainee
Product configurator – Laravel, MySQL, Tailwind & Vue.js | LIVE
Mountain iT | Groningen, NL | July 2021 – Current
• Conceptualized and developed a user-centered UX/UI from registration to payment of a shopping platform where users can personalize and purchase products
• Created and consumed (internal and external) RESTful APIs
• Enabled users to log in and register with a magic link
• Implemented WebSocket (Pusher) to send real-time notifications
• Integrated a payment portal and utilized webhooks to handle payment status changes
• Built the CI/CD pipeline and deployed with GitLab and Docker
• **Result**: at least 1 client will implement the pilot product in September 2021

Magento developer intern
ECommerce shops – PHP, jQuery, JavaScript, XML, HTML, LESS
Mountain iT | Groningen, NL | March 2021 – June 2021
• Implemented the responsive design of web shops' storefronts
• Managed customer relationships and set expectations
• Built PHP modules and JavaScript custom features
• Fixed bugs and supported customers with server, database, and backend code errors
• Maintained clear and readable documentation
• **Result**: created 2 fully functioning webshops in 4 months with 100% customer satisfaction
